## Stand Alone AD Displays

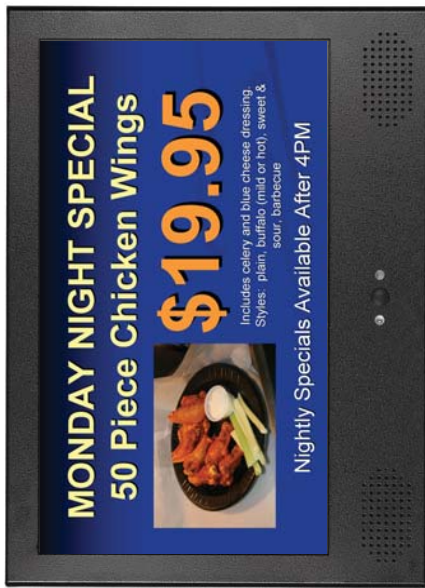

Digital Imaging Source offers a complete line of Digital Signage Solutions. Our products can loop JPEG and MPEG file formats. All solid-state design means years of worry free silent operation.

Our "Stand Alone AD Displays" are ideal for wall applications where space is limited. We also have table top and floor mount options available to offer maximum portability. All of our systems run off compact flash cards (unless otherwise noted under the specifications).

Content creation is simple and easy and can be created using software that you already own and are familiar with.

We also have a network accessible media player available.
